

#### Gender Scan<sup>TM</sup> 2021 Survey Methodology:

The Gender Scan<sup>TM</sup> 2021 survey was conducted online (in 117 countries) from March to August 2021 on a declarative basis with 30,001 male and female respondents in the world.

In developing countries, 675 teenagers, among which 464 girls, 194 boys and 17 others, responded to the survey., which provides for a 3,8 margin of error The respondents studied in 24 different developing economies – Angola, Argentina, Barbados, Brazil, Chile, China, Colombia, Costa Rica, Ecuador, Ghana, Guatemala, Guyana, India, Mali, Maurice, Mexico, Panama, Peru, Philippines, Rwanda, Somalia, South Africa, Tunisia, Uruguay.

Definition of teenager here used is based on the UNESCO definition of secondary education, thus comprising levels 2 and 3 of ISCED (International Standard Classification of Education), about 11 years - depending on the age at which the students access secondary education and above). This definition allows for consistent comparisons of a geographical area to the other).

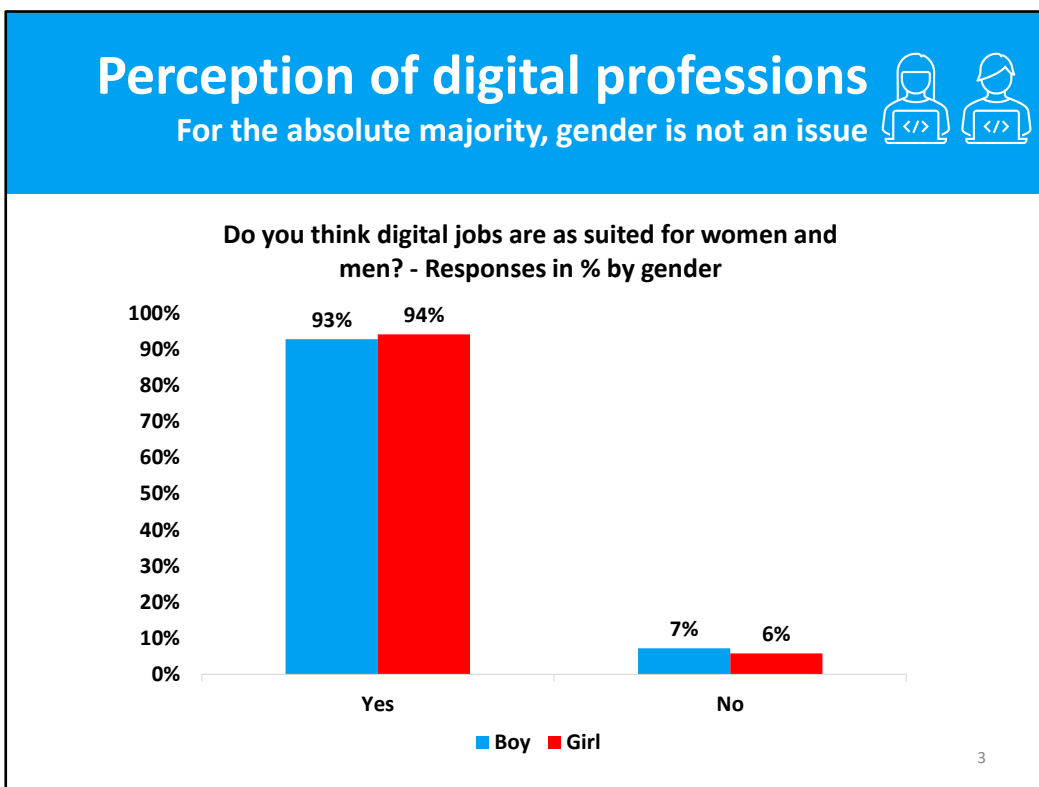

As for the perimeter “developing countries”, we follow a United Nations’ (UN) widely used classification, as present, among other documents, in the [2021 World Economic Situation Prospects](#). We are aware of the problems and limits of this conceptualization and do not embrace it unconditionally. However, alongside many analysts, scholars and consulting firms, as well as UN agencies, we consider it adequate for the purposes of benchmarking and comparison.

# GS 2021 survey – Developing countries Teenagers report – table of contents

<b>Is the digital sector as suitable for both men and women?</b>	3
<b>The wish to work in the digital sector</b>	5
<b>The motivations of teenagers interested in digital technology</b>	6
<b>What inhibits teenagers' interest in digital technology</b>	9
<b>Knowledge of digital professions</b>	11
<b>Levers for change: extracurricular digital training</b>	12
<b>The most desired jobs by gender</b>	14
<b>Perception of digital professions</b>	15
<b>Information sources on digital professions</b>	17

For more than 90% of the adolescents who responded (675, including 194 boys and 464 girls), the question is not an issue.

The breakdown of yes answers, in the verbatim (592, out of a total of 598, including 170 boys and 428 girls) is as follows:

Women and men are equal Boys: 60% Girls: 57%

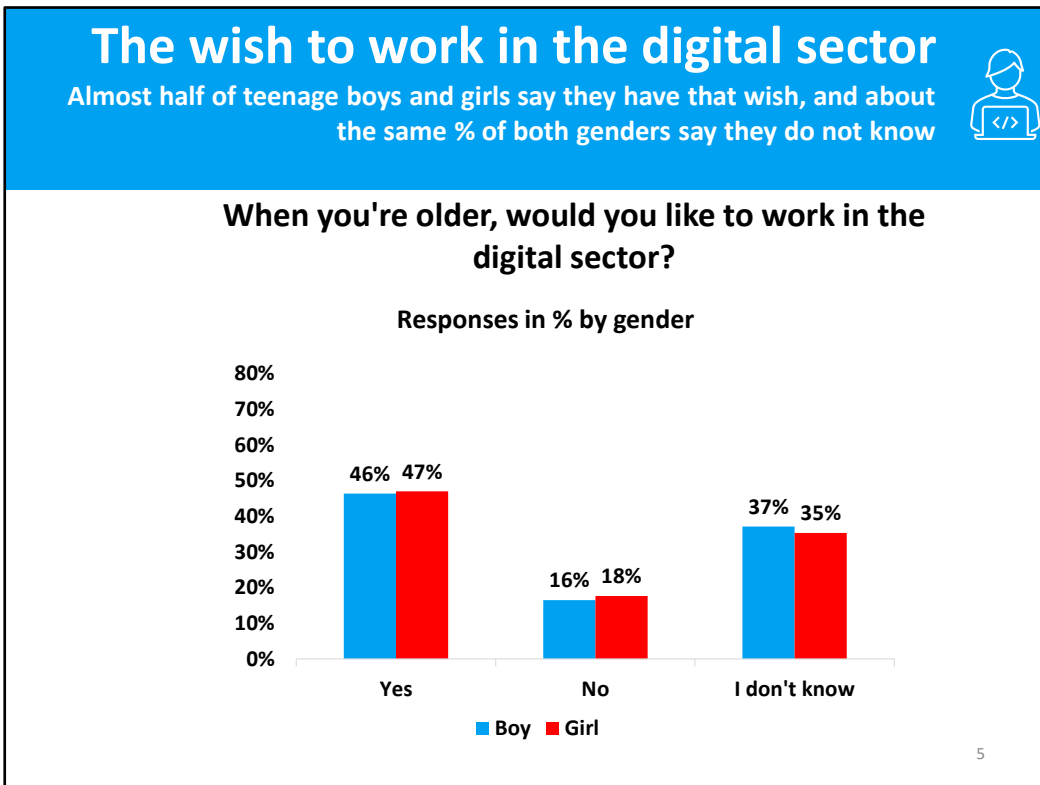

Digital technology does not require the ability of men or women Boys: 26% Girls: 21%

There are no gendered jobs Boys: 5% Girls: 14%

We have the same skills, it is society that creates differences Boys: 0% Girls: 4%

I don't see why it shouldn't be suitable for both Boys: 2% Girls: 2%

Is the digital sector as suitable for both men and women? – Verbatim Yes 		
<b>Digital technology does not require the capacity of men or women</b>	"Because they all can do this work when given the opportunity." Boy, Ghana, 13 years old	"We all have the capacity to perform in this area. There should be no stereotypes that impede our development as people." Girl, Mexico, 16 years old
<b>Women and men are equal</b>	"Men and women are equal in that regard and deserve equal opportunities." Boy, Peru, 17 years old	"Because no matter the gender we are capable of everything if we have the passion to do it." Girl, Guatemala, 17 years old
<b>There are no gendered professions</b>	"Genuinely, if you like the job, any job, it suits you and gives you the income you want, it should suit anyone, a woman, man or whatever you identify yourself as." Boy, Peru, 13 years old	"Because gender does not condition our interests and abilities, we can all be everything." Girl, Argentina, 17 years old
<b>I do not see why it would not be suitable for both</b>	"If men can do it, why can't we?" Girl, Argentina, 14 years old	"There is no reason to think that women are less capable than men in technology, especially considering how essential they have been in programming." Girl, Brazil, 18 years old
<b>We have the same capabilities, it's society that creates differences</b>	"It doesn't matter the gender, but the love we have in what we do. However, there is still a big gender gap, that we must stop. Being a girl, I have suffered discrimination from men for studying computer science." Girl, Uruguay, 19 years old	"Both men and women should have the right to pursue what they feel capable of and to eliminate the gender prejudice against women's job performance". Girl, Chile, 17 years old

Only 18% of girls and 16% of boys do not want to go digital.  
 Very similar percentages for both genders.

Do you know the job you would like to do in the future?

	Boys	Girls	Total
I have a vague idea	32%	38%	36%
Yes, absolutely	61%	52%	54%
No, not at all	7%	10%	9%

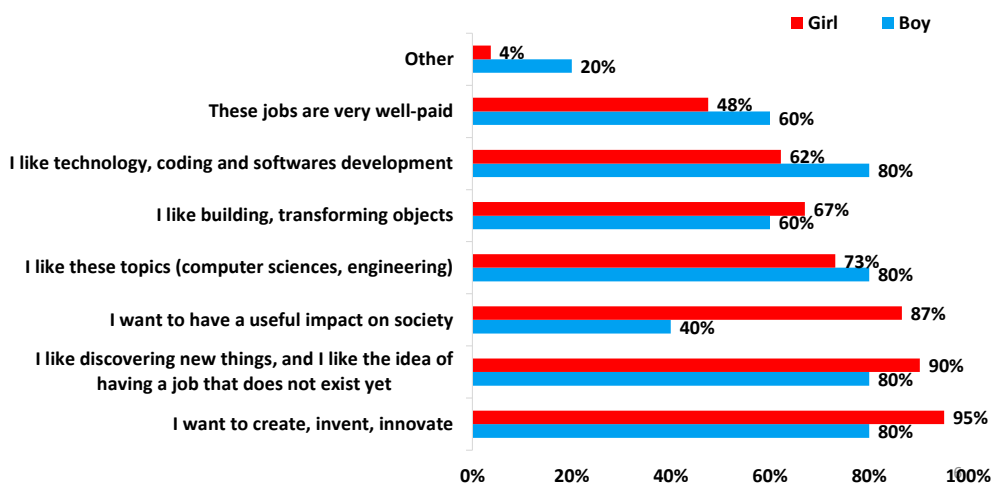

## The motivations of teenagers interested in digital

Out of 511 who answered that they want to go digital later in the verbatim (93 boys and 218 girls), responses to the explain why were:

More boys (79%) than girls (74%) are simply interested in digital or like the field. Some elements mentioned to explain this passion/interest are:

- Technology (10% boys, 14% girls)
- Continuous learning (17% boys, 9% girls)
- Range of possibilities (3% boys, 10% girls)
- It is very present in our lives (7% boys, 6% girls)
- Digital tools (6% boys, 3% girls)

On the other hand, **for 8% more girls (10%) than boys (2%), digital technology represents the future.**

<h2 style="text-align: center;">The motivations of teenagers interested in digital technology - Verbatim</h2> 		
<b>I like the field, it interests me</b>	"It is a subject that allows to develop the technical knowledge and management of energy and the components of a computer." Boy, Mexico, 17 years old	"Because I find it fascinating and I'm passionate about the infinite possibilities that technology can create. " Girl, Brazil, 18 years old
	<b>I will need it for my job</b> "It would be good to study technology and apply it in my career." Boy, Mexico, 19 years old	"Technology will be used in most professions; I would like to study architecture digitally." Girl, Panama, 17 years old
<b>It is the future</b>	"Yes, because it is the future." Boy, Chile, 17 years old	"It is a tool that will be essential as a job in the future." Girl, Peru, 17 years old
<b>Digital technology has a significant and positive social impact</b>	"I am passionate about digital, and I would like to contribute to the digital development of my country." Boy, Mali, 20 years old	"I would like to use technology to solve different problems that my society faces." Girl, Rwanda, 18 years old
<b>It's a field that recruits, there is work</b>	"To be able to have more job opportunities." Boy, Peru, 16 years old	"Because I like it and more and more people are being sought in the digital area, because it is what is coming and in fact it is already being implemented." Girl, Argentina, 16 years old

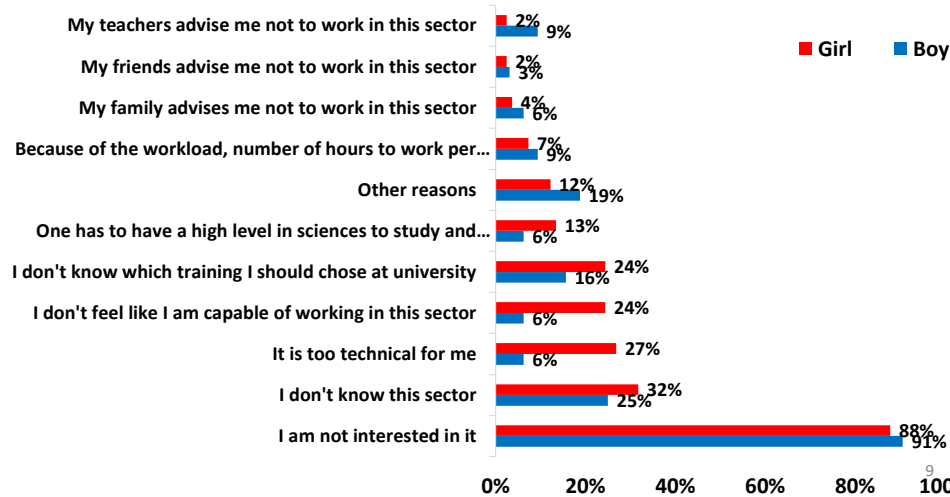

## What inhibits teenagers' interest in digital

A higher % of girls declares that it is too technical, they do not feel capable, and one must have a high level of knowledge in science

### Why don't you feel like working in the digital sector in the future?

Responses in % by gender

The 16% of boys and 18% of girls previously having declared not to be interested in heading towards digital technology in their studies/career:

- lack interest in similarly high proportions;
- 7% more of girls declare **not to know the sector**;
- almost 3 out of 10 girls say it's **too technical** versus less than 1 out of 10 boys;
- 18 % more girls have **self-confidence** problems: 24% vs only 6% of boys **do not feel capable**;
- **13%** think that it **takes a very high level of science/ math** (vs 6% of boys, or half of that);

The verbatim corroborates the statistics of closed questions. New information is:

- 2% of boys, 11% of girls are not interested in digital because they **already have another project in mind**.
- 7% of boys, 4% of girls say that **digital does not suit them**, for various reasons - their eyes do not like screens, they want to work outdoors, in contact with people, in connection with nature or animals
- 2% of boys, 3% of girls are interested in digital but do not want to work in it, either for a question of principles, since they believe digital is harmful to society, or because they do not like it to this extent, or because it is a hobby for them, not a possible job.

Distribution of verbatim responses by gender (out of 212 answers of teenagers who do not wish to go into digital : 60 boys, 152 girls.  
 I'm not interested, I don't like digital 58% boys, 55% girls  
 I want to move towards another field 2% boys, 11% girls  
 It does not suit me 7% of boys, 4% of girls  
 I am interested but I don't want to make it my job 2% boys, 3% girls  
 I don't know enough about digital jobs 17% boys, 14% girls  
 It's very difficult, I'm not capable 7% boys, 6% girls

What inhibits teenagers' interest in digital - Verbatim 		
<b>I'm not interested, I don't like digital technology</b>	"It's something that doesn't catch my eye." Boy, Peru, 11 years old	"I don't like to see myself doing something involving the digital world." Girl, Mexico, 12 years old
<b>I want to move towards another field</b>	"I like other things; I prefer politics." Boy, Peru, 17 years old	"I prefer natural sciences, engineering, art. Also, I'm not very good in digital." Girl, Costa Rica, 16 years old
<b>That does not suit me</b>	"I don't like the idea of sitting in one place all day for work." Boy, Peru, 14 years old	"I would not like to be sitting in front of a computer most of the day." Girl, Panama, 18 years old
<b>I'm interested in it but I don't want to make it my job</b>	"I'm adept digitally, but it doesn't really interest me." Boy, Peru, 16 years old	"I like it but it is not of my interest to work with it." Girl, Mexico, 18 years old
<b>I don't know enough about digital professions</b>	"I don't know what that is about, I have no knowledge in the area. Knowing more about it and learning would be nice." Boy, Mexico, 16 years old	"I don't know the necessary skills, requirements and opportunities that this area offers." Girl, Argentina, 17 years old
<b>It's very difficult, I'm not capable</b>	"I don't have the necessary knowledge; it seems complicated for me." Boy, Mexico, 17 years old	"I don't know much about technology, just the basics on how to use it. It is a bit difficult to understand" Girl, Mexico, 17 years old

Out of 151 who followed an extracurricular digital training (42 boys and 109 girls).

The majority (65%) of teenagers know a few digital professions.  
A significant proportion ( $\pm 28\%$ ) knows none.  
Only 7% of boys and girls knows many of them.

Ranking made from the verbatim of 359 adolescent respondents, including 240 girls and 129 boys. The occupations highlighted are the common occupations between girls and boys in the top 10.

The top 5 digital professions:

- Web designer
- Game designer
- Project Manager
- Robotics expert
- Internet Police officer

Slightly **higher % of interest from girls than boys** regarding :

- Web designer (53% vs 45%, **+8%**)
- Project Manager (44% vs 38%, **+6%**)
- Data analyst (34% vs 28%, **+6%**)
- Tele surgeon (23% vs 21%, **+2%**)

Even if significant gap in game design, nearly 50% of girls, and 60% of boys, find the job of game designer interesting

# Perception of the digital professions

Higher % of girls very interested in web design, project management, robotics and cloud computing engineering

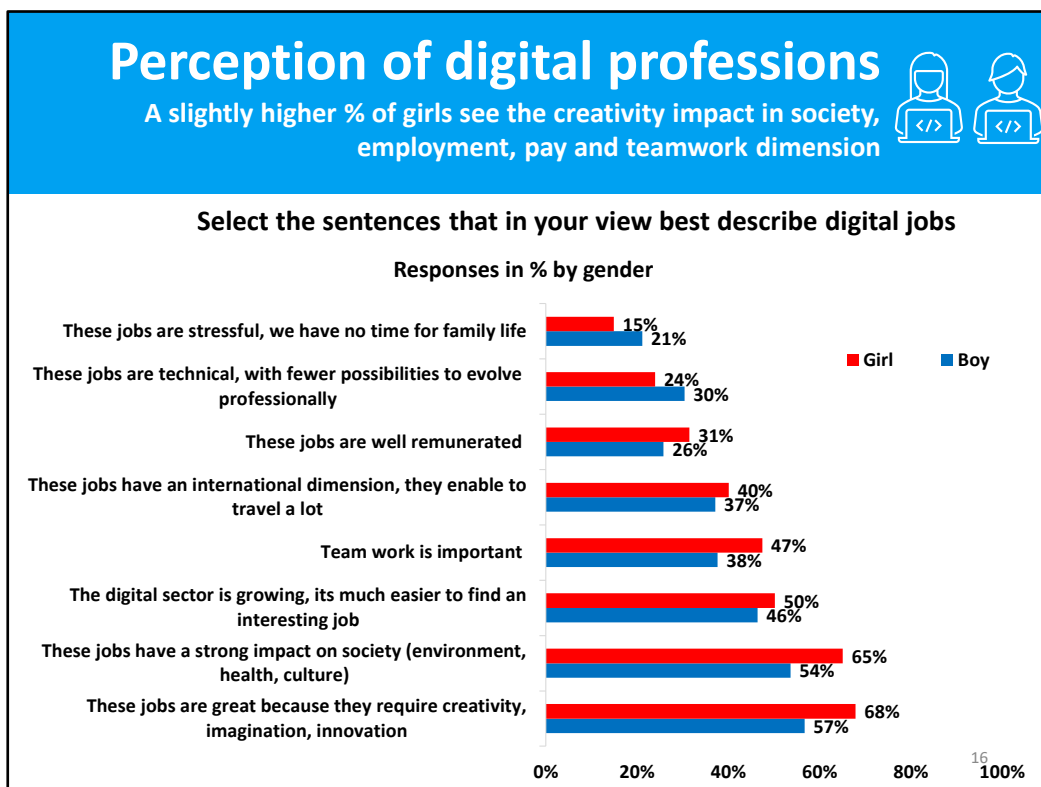

Do you consider the following jobs interesting?

Respondent Yes, absolutely in % by gender

A higher % of girls than of boys have positive perceptions of digital professions, as:

- innovative occupations, (68% vs 57%, **+11%** for girls)
- with an important impact on society, (65% vs 54%, **+11%** for girls)
- a job sector that is on the rise, where it is easy to find an interesting job (50% vs 46%, **+4%** for girls)
- a profession where teamwork is important (47% vs 38%, **+9%** for girls)

Overall similarities of the sources mentioned by girls and boys.  
 The main sources of intelligence for both genders would be a professional in the digital field, and websites.
